Orders Finally Come from Washington for Action in Trust Case.

Trenton, N. J., Oct. 31.—United States District Attorney Vrceland yesterday re-ceived instructions from the department of justice at Washington to have served the subpœnas issued in the suit of the government against the United States Steel corporation. These subpœnas have been lying on the desk of the United States circuit court clerk here for the past few days, awaiting instructions from Washington, Mr. Vreeland said there were two reasons for the delay One was that his office did not have the end of his longest visit to this city.

The president scorned to have the top lifted on his automobile and with head bared a greater part of the time, he rode through the drizzle in apparently very happy frame of mind.

His first trip of the day was to the lift of the defense on the ground that neither believes in the infliction of the death penalty on circumstantial evidence.

Both Frampton and Winter, previous lay on the lift of cause by the defense and the other was that there were not here a sufficient number of copies of the bill required arrived yesterday morning. Large Refiners Reduce the Price Ten Points. New York, Oct. 31 .- The American

Sugar Refining company, Arbuckle Bros, and B. H. Howells Son & Co, reduced the price of refined sugar yesterday to 6.60 cents, from 6.70 cents. The Federal Sugar Refining company continues to quote 6.50 cents.

The sugar trade is in a stagmant state, with buyers displaying very little in-terest. They are waiting for the Cuban and Louisiana supplies, which will begin to come upon the market in another month. The refineries are practically idle, and the amount of sugar on hand ready for market is exceedingly small.

Self-Loading Shotgun, 12 Gauge, Model 1911.

This new Winchester is a wild-fowl gun par excellence. The recoil developed by the discharge of the gun cocks the hammer, ejects the fired shell, feeds a loaded shell from the magazine into the chamber and leaves the gun ready to be shot again. As the trigger must be pulled for each shot fired, the gun is at all times as completely under the control of the user as any double or single barreled gun. For strength and safety it is unapproached by any similar gun. It is made of Nickel steel throughout, and the receiver has the Winchester patented "Bump of Strength," which makes it strongest at the point where the greatest strain comes. As the recoil is divided in this gun, the "kick" of heavy loads is minimized, which makes it wonderfully pleasant to shoot. The Winchester Self-Loader is not one of those recoil-operated shotguns which have to be adjusted for different loads. It is a gun that requires no favoring or tinkering. It will shoot any standard load, from a "blank" to the heaviest, without the slightest change being made in the mechanism. It is always ready for any load, be it light or heavy. It is a hammerless, two-part take-down, without any moving parts outside of the receiver to catch in the clothing or injure the hands, and in every detail it is fully up to the established high Winchester standard.

Look one over at your dealer's, or send to the Winchester Repeating Arms Co., New Haven, Conn., for descriptive circular
